

Reasoning rules the road: semantic reasoning on knowledge graphs deployed in vehicles

Haonan Qiu

Research Engineer, BMW Group

Peter Crocker

Co-founder and CEO, OST

Agenda

- An introduction to OST and semantic reasoning
- Reasoning onboard vehicle use cases
- Practical tips on how to get started with reasoning

Oxford Semantic Technologies (OST)

AI tech spun out from
Oxford University in 2016

RDFox: Knowledge Graph &
Semantic Reasoner

Co-founder Ian Horrocks
Lovelace Medal Winner

Investment by
Samsung Venture Capital

Knowledge Representation
& Reasoning (KRR)

Existing clients inc. Global
FTSE 100 and Fortune 500

What is our purpose

**We help organisations
find accurate answers to
complex questions in an
instant.**

**We achieve this by
combining human knowledge
and data with rules-based
artificial intelligence.**

What makes RDFox[®] different

Our USPs

**Semantic
Reasoning**

**Speed &
Scalability**

On Device

**Oxford
University**

Advanced Reasoning Functionality

RULE LANGUAGES SUPPORTED: OWL2-RL, SWRL, DATALOG

Inferred & materialised
relationships

Calculations

Aggregation

Negation

Explainable

Incremental reasoning

Independent performance benchmark

An overview of the performance of five triple-stores and an experimental SPARQL query engine.

This benchmark measured the import and query execution times by using Wikidata as a benchmark.

Wikidata is one of the world's leading RDF data sources with over **15 billion triples**.

RDFOx® was found to be the **only triple-store** that successfully **exported** the **entire Wikidata** data.

[Click here to access full benchmark report](#)

Time to import

(hours)

RDFOx

■ 6

Query speeds

How much faster is RDFOx compared to other triple-stores.

TS1	5x
TS2	11x
TS3	17x
TS4	82x
TS5	750x

Our Customers

The Pain

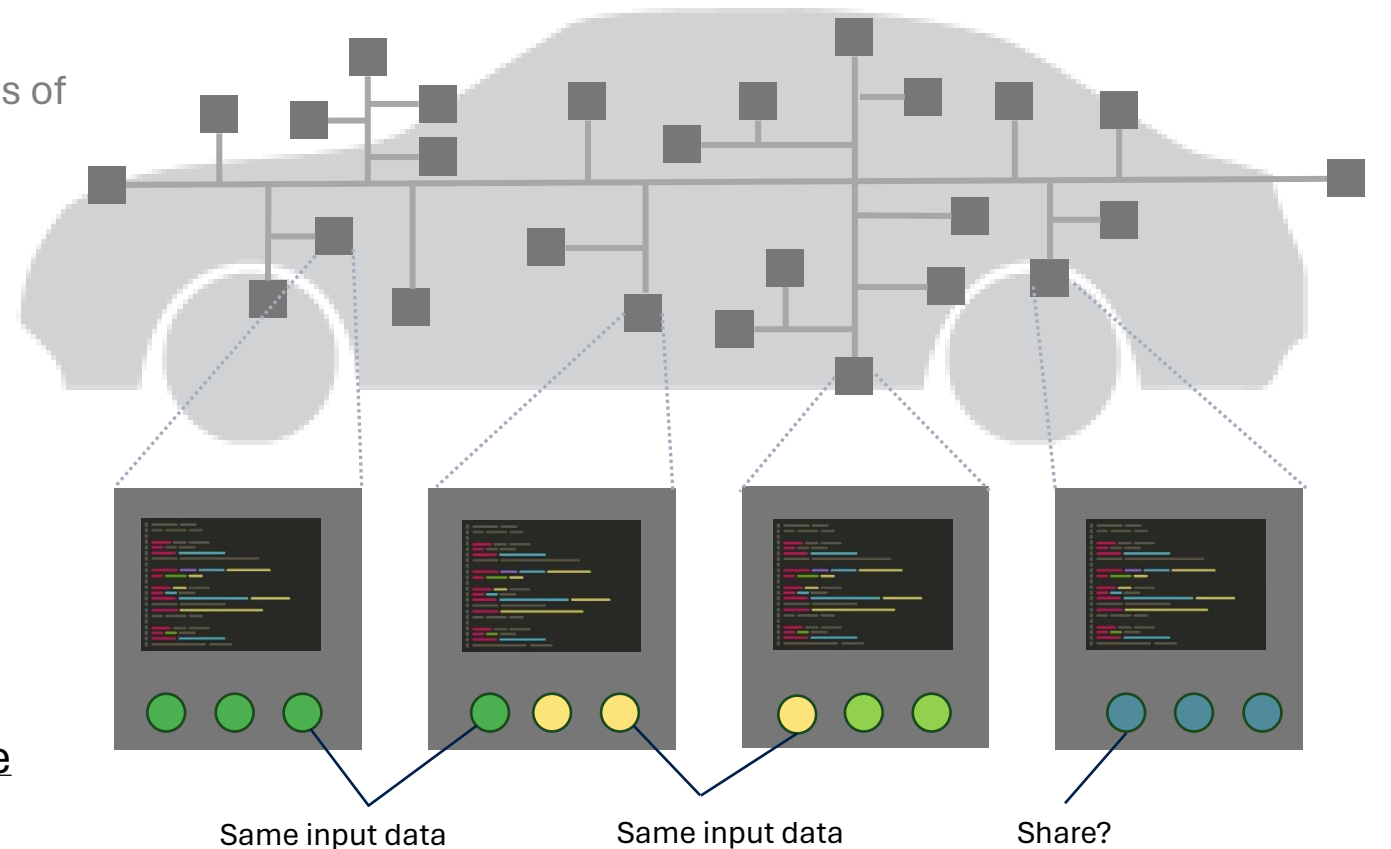

- Increased complexity:

- Numerous ECUs (~100 ECUs) [1]
- Sophisticated software (~100 million lines of code or more) [1]
- Hard to **adapt** and **maintain** efficiently

- Isolated data processing:

- **Duplicated** code
- Process logic **coupled** with the data format and the application function
- Difficult to **integrate** data

-> issues of application-centric architecture

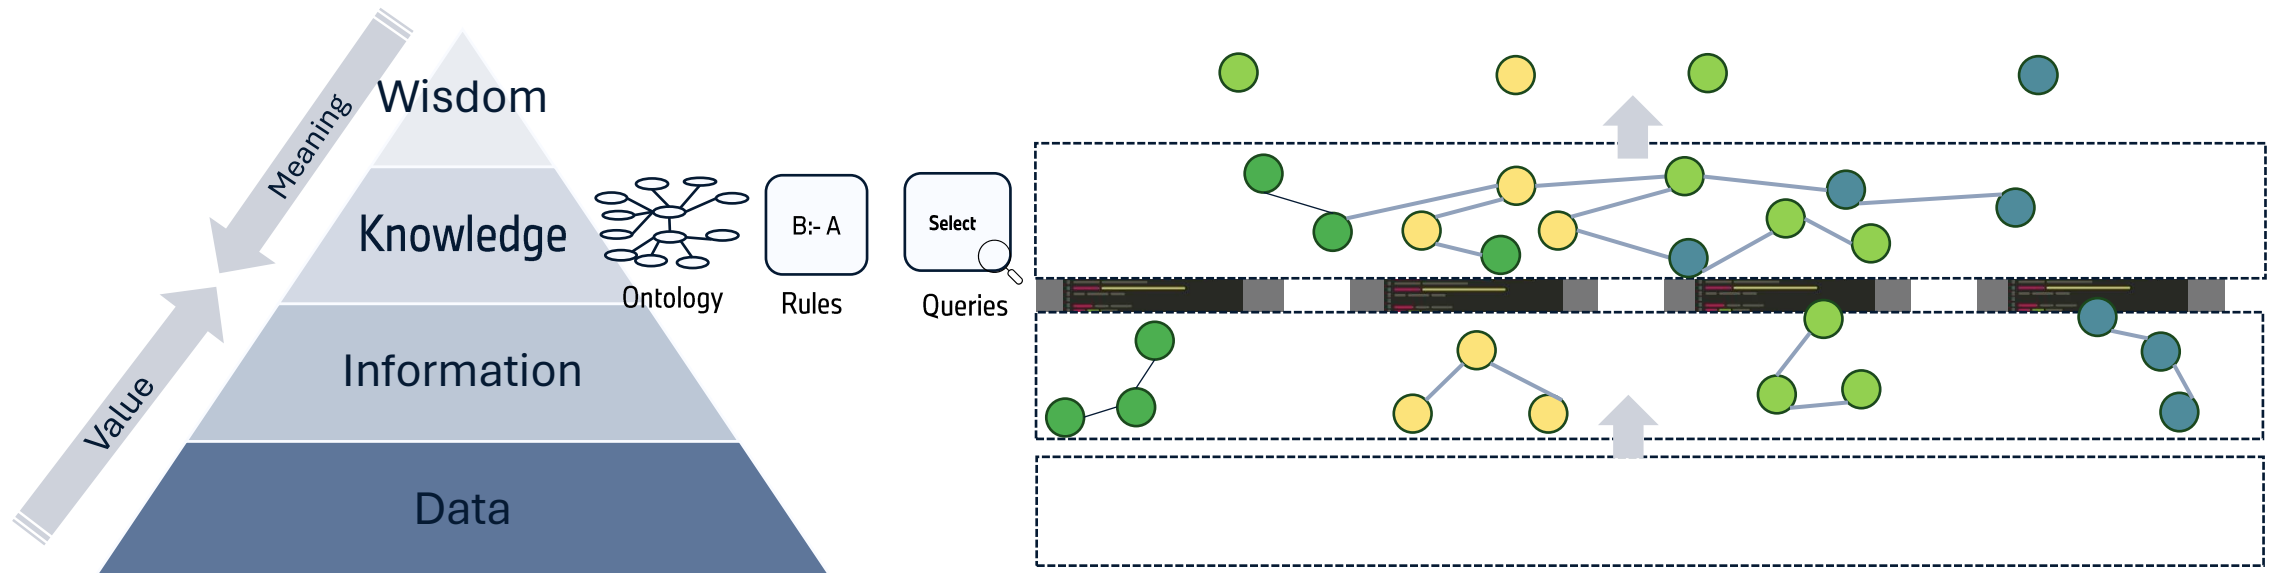

■ Electronic Control Units (ECU)

[1] <https://spectrum.ieee.org/software-eating-car>

A Knowledge Layer

- Shift to Data-Centric Architecture
 - Data is the centre
- Data, Information, Knowledge and Wisdom (DIKW)
 - A conceptual framework to utilize the data
 - Offers integration and insight

Benefits?

Common

- Domain independence
- Rapid adaptation
- Scalability

Health

```
:close_to_goal[?user] :-  
  :daily_steps[?user, ?steps],  
  :step_goals[?user, ?goal],  
  Filter(?steps > 0.9*?goal  
    && ?steps < ?goal).
```

Right of Way

```
:has_right_of_way[?vehicle] :-  
  :arrived_first[?vehicle, true], |  
  not EmergencyVehicle[?vehicle].
```

Map Processing

```
:hasRightLane[?lane2, ?lane1] :-  
  :hasLeftLane[?lane1, ?lane2].
```

Rule Engine

Rule Engine

- Determinisim

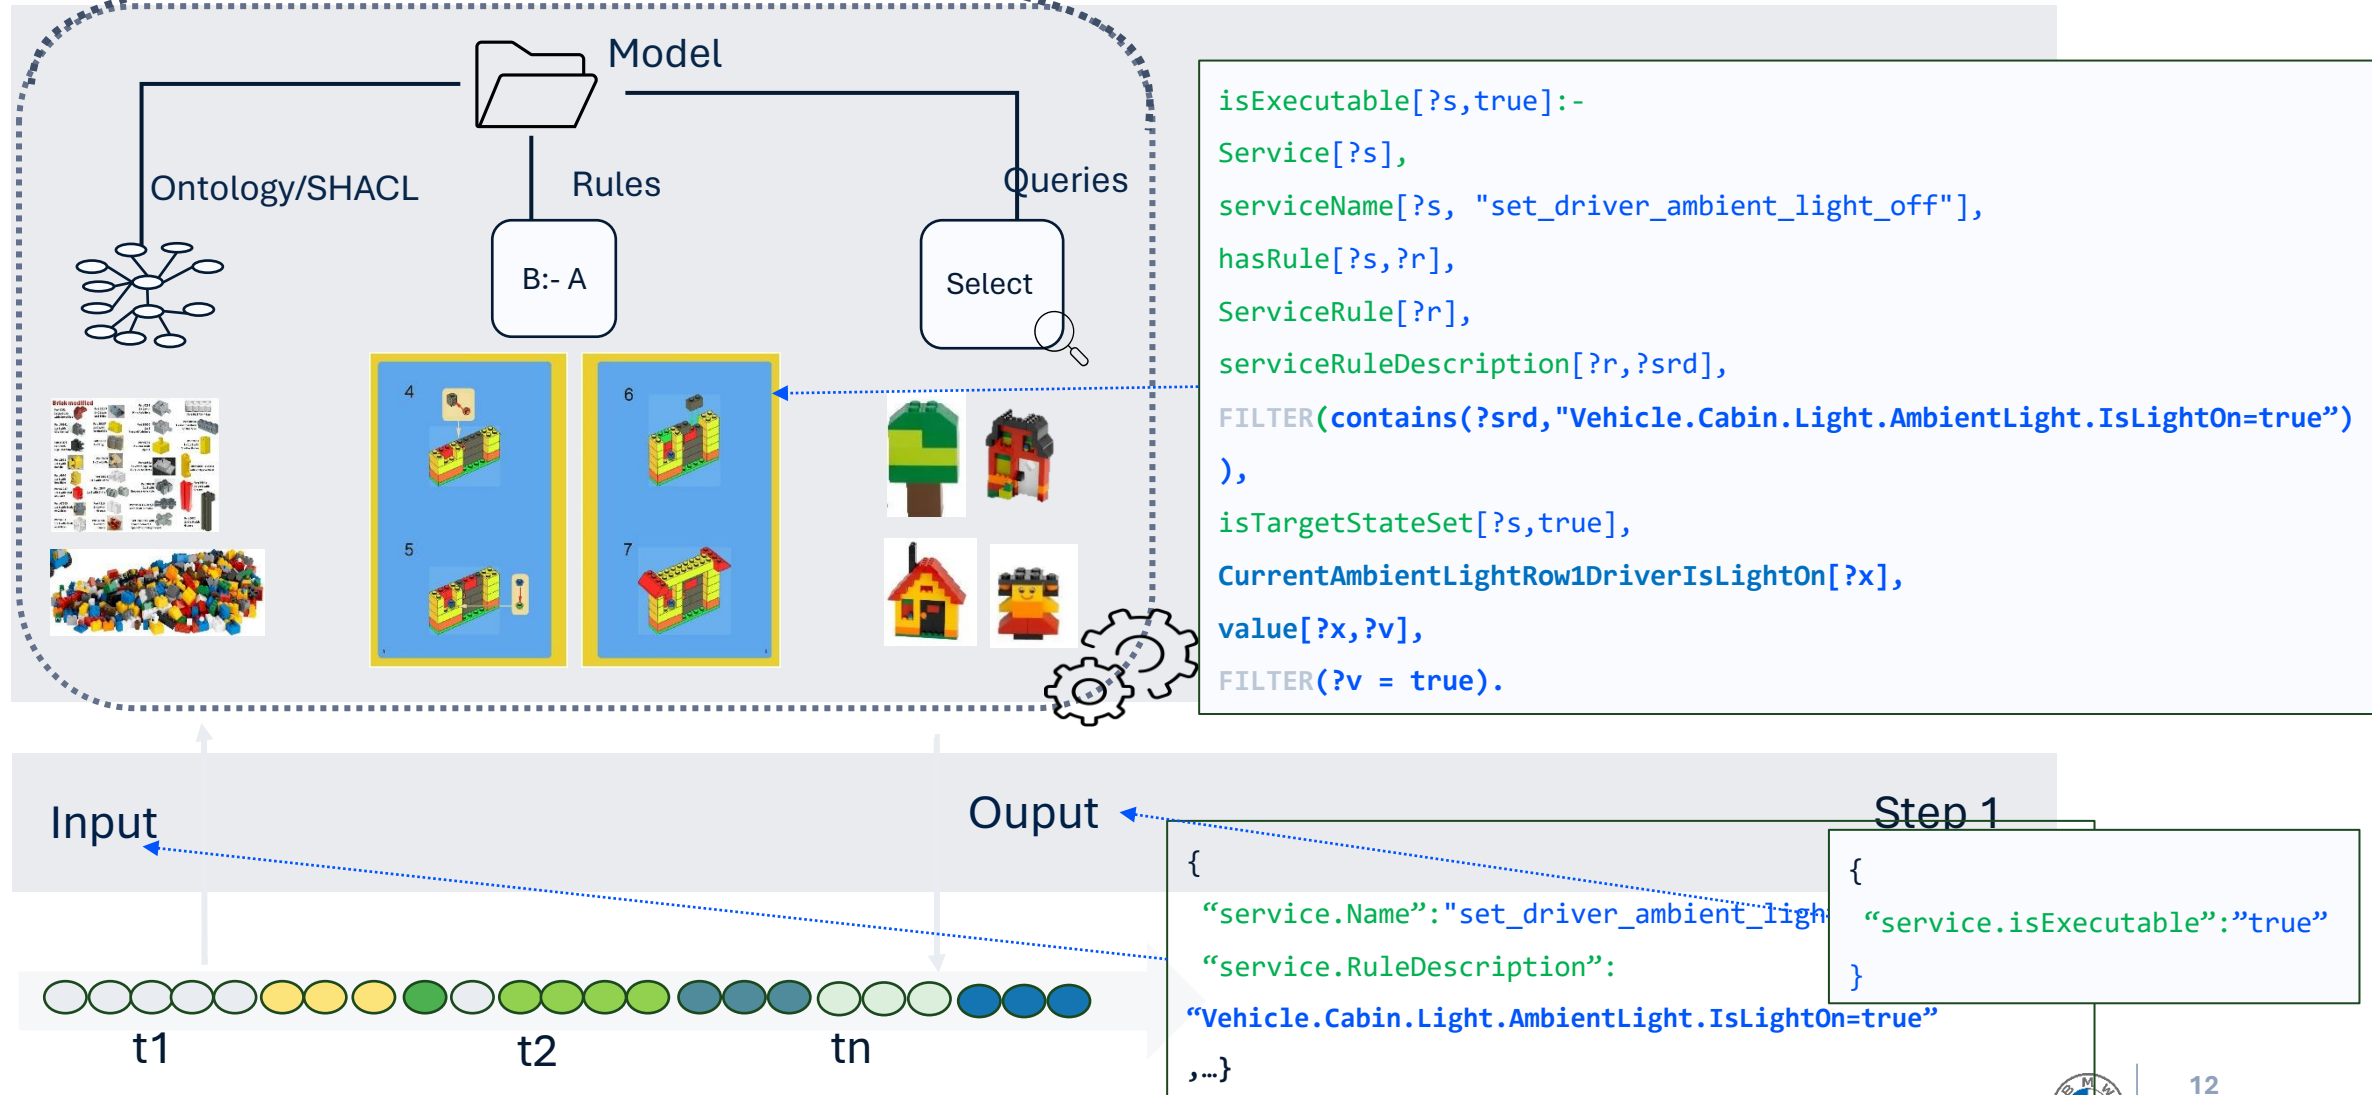

- Explainability

```
Fact :provides[GRS-SRS-sm34-sc4-ps7, g17, :Rotation]  
  
Proof tree []  
  > ?p :provides[GRS-SRS-sm34-sc4-ps7, g17, :Rotation]  
  > ?p :cost[GRS-sm34-sc4-ps7, 121]  
  > ?p :id[GRS-sm34-sc4-ps7, "sm34sc4ps7"]  
  > ?p :providedSpeed[GRS-sm34-sc4-ps7, 800]  
    > ?p :compatibleWith[sc4, :ps7]  
    > ?p :compatibleWith[sm34, :sc4]  
    > ?p :cost[ps7, 24]
```

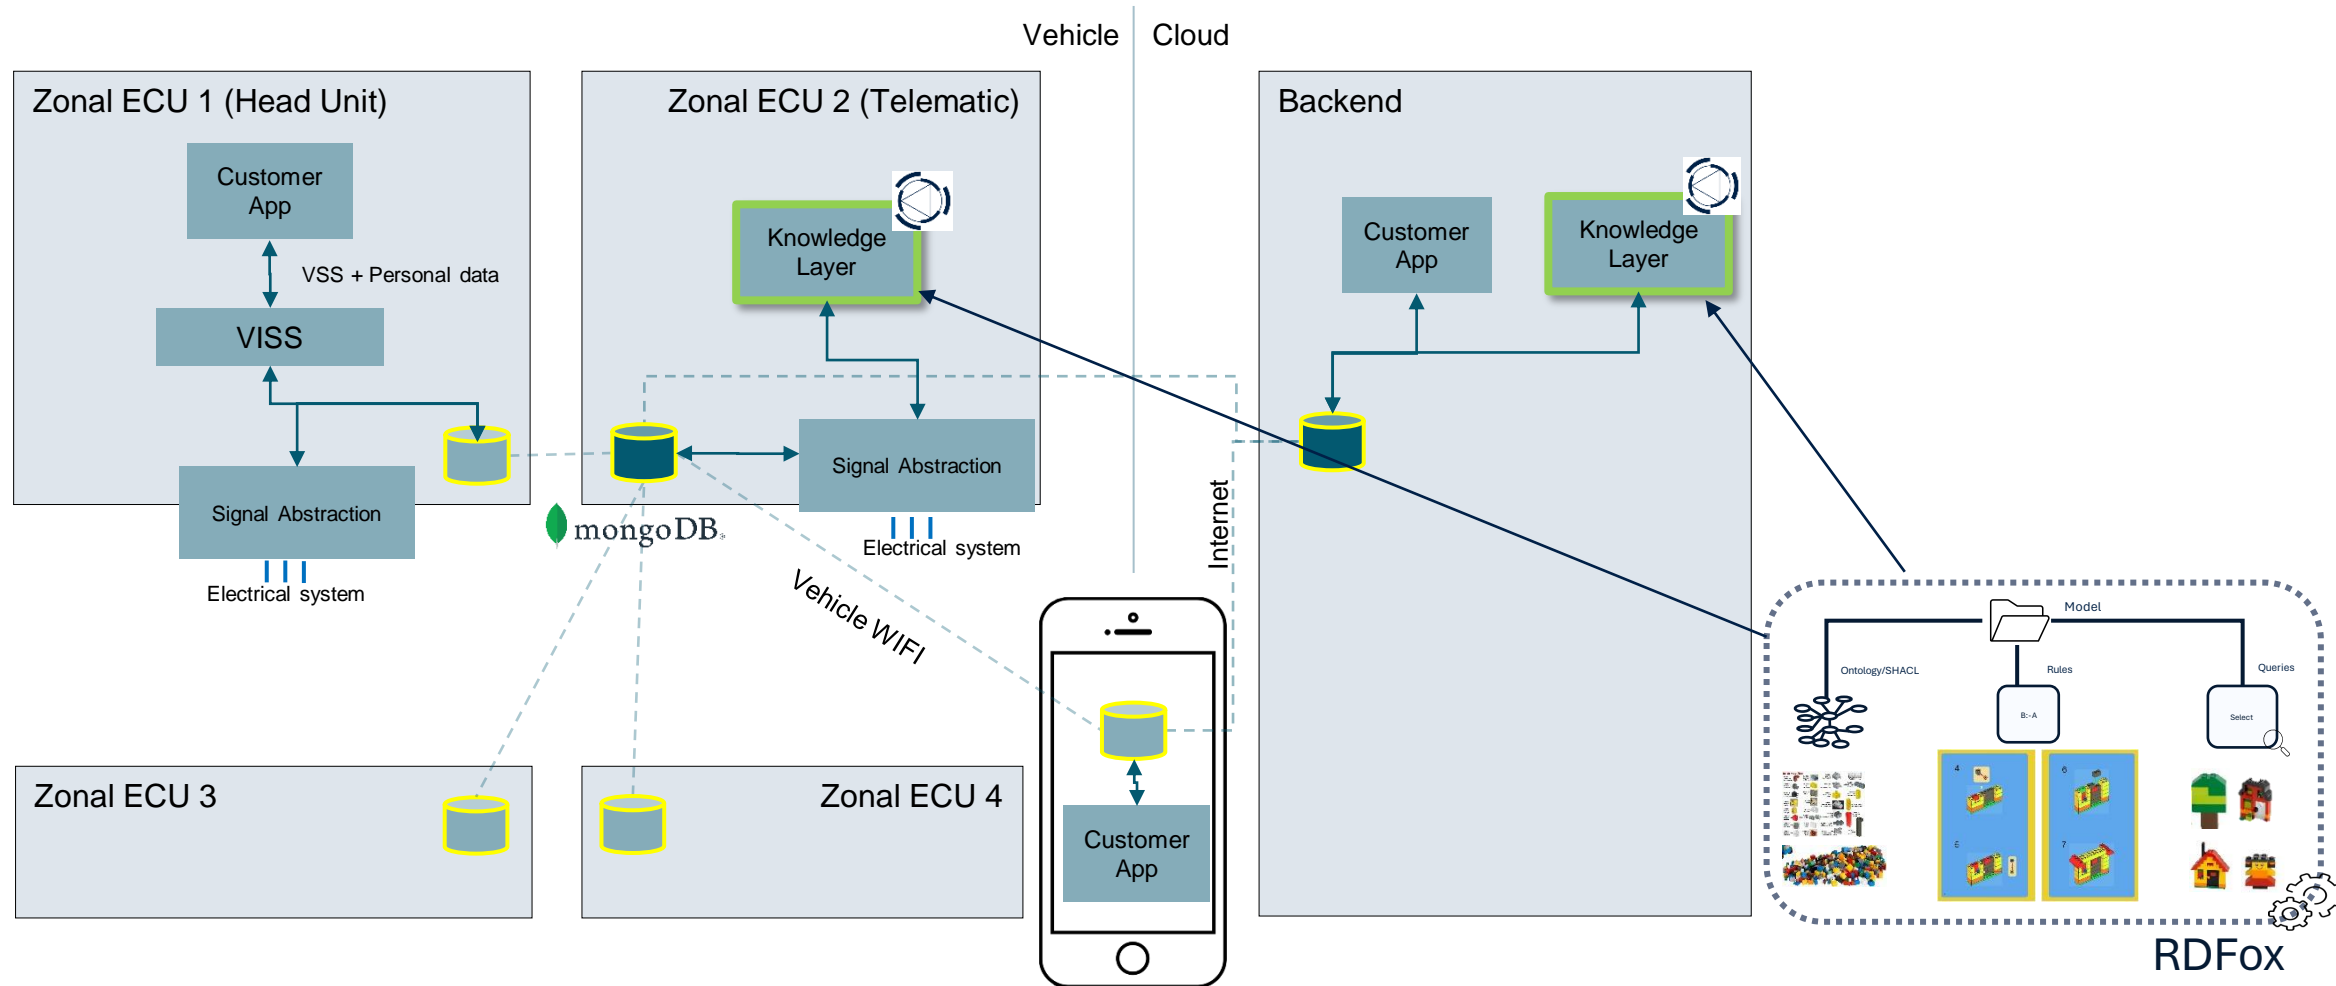

- Transparency

Bring the **logic** only!

Practical tips on how to get started

1. Start!
2. Demonstrations and showcases
3. Placement of the rule-based engine, such as RDFox
 - Input/out
 - The data process flow
 - begin with ontologies, grow relationships with the rules

**Download
RDFox Free
Edition**

- Be descriptive with rule names
- Keep rules simple and focused
- Use consistent formatting
- Document your rules
- Optimize rule ordering
- Avoid redundancy
- Test your rules incrementally

Power up your knowledge graph

Why Knowledge Graphs?

Enables applications that are best served by the modelling of relationships.

Why Reasoning and Rules?

Enables accurate AI decision systems by inferring new facts based on expert knowledge and data.

Why RDFOx®?

Advanced reasoning, high performance and on-device support, backed by OU research.

What Next?

Where can you see the applications to use **rules-based AI** in your business area?

Request a reasoning demo

See how it can transform your semantic projects.

Join a free reasoning workshop!

Learn how to use reasoning with RDFox free edition.
